

PROFILE:

I am a third-year B.Tech Computer Science student at Roland Institute of Technology, Berhampur, with a strong foundation in Python programming, data structures, and algorithmic thinking. Demonstrates proficiency in crafting efficient, modular code and debugging complex logic flows. Passionate about building real-world solutions using Python, including voice-controlled tools, speech recognition systems, and API integrations. Known for persistent problem-solving, hands-on experimentation, and a practical approach to development. Adept at list comprehensions, recursive functions, and object-oriented design, with a growing interest in full stack development and cloud-based applications.
